

Proposal for Adoption by NEISA for events hosted in our conference.

The Collegiate Dinghy Class Rules shall have the following sentence added as Paragraph 6.5.2

A ***recommended policy*** of all host schools to restrict the rake of the mast while conducting races to reduce the likelihood of head injuries. The bottom of the boom with the outhaul tensioned snugly shall not be closer than 22” under minimal load from the top of the transom. The sidestays shall have a tension of approximately 250 lbs (29 on a Loos tension gauge) when measuring the distance.
